Chemical logistics is multi-faceted

Your partner for innovative solutions

As a complete provider, Chemion Logistik GmbH covers the entire range of logistical services in the chemical and related industries. We are a member of the CURRENTA Group, a network of highly specialised companies managed by CHEMPARK-manager and -operator CURRENTA GmbH & Co. OHG with the subsidiaries Chemion Logistik GmbH and Tectrion GmbH. Our extensive experience in site logistics and handling dangerous goods is the foundation for our specialty: bundling services tailored to our customers' needs and managing complex logistics processes. Our customers benefit from the expertise and dedication of our nearly 900 employees. Chemion has locations in Leverkusen, Dormagen, Krefeld-Uerdingen, Monheim, and Duisburg.

Competent and diversified for your success

As an experienced, competent, and reliable partner at your side, Chemion combines chemicals and logistics into customised service packages that are precisely tailored to your needs. For many years, we have been offering flexible, individual, and efficient logistics solutions at our locations and your operations. Our expertise and commitment meet the complex requirements of logistics for chemical production, storage of hazardous substances, and proper handling of dangerous goods. You can rely on us so that you can focus on your core areas of expertise and achieve even greater success.

Discover the recipe for logistics success with Chemion! We would be happy to provide you with detailed information on the benefits of your Chemion solution.

We look forward to hearing from you!

Piece Goods Logistics

Expertise for multiple classes

Smooth handling of solid materials and liquids in storage: Our warehouses offer you ample space giving you the flexibility you need. We excel when it comes to safety: from containment basins and special floor sealing, to fully automated sprinkler and foam extinguishing systems, and gas detection systems. We pick, load and secure your goods so that they reach their destination safe and sound.

Chemion Piece Goods Logistics at a glance

- Storage of substances of hazard classes 3, 4.1B, 4.3, 6.1A–D, 8A, 8B, 10, 11, 12, 13
- 70,000 pallet spaces in block, rack and outdoor storage areas
- Handling, picking and cross-docking activities
- Shuttle services between production/filling and storage
- Value-added services from labelling to disposal
- Cargo securing

Silo Logistics

High output volume

Our decades of experience at the silo logistics centre in Krefeld-Uerdingen provide the best conditions for the storage and handling of granulates. Our operator expertise and dedicated team of 60 employees ensure fast and reliable filling in large and small containers, from 25 kg bags to silo trucks. In addition, we silo containers and take care of palletising, labelling, and shipping.

Chemion Silo Logistics at a glance

- 60 committed employees
- Operation of two customer-owned silo plants for Makrolon primary and compounding products
- Quantity feedback in the customer system
- Management of customer-specific packaging for filling
- Bulk and container loading
- Cleanroom filling for sensitive products
- Technical support, maintenance and repair of customer-owned systems

Container Logistics

Your all-in-one provider

Chemion offers comprehensive solutions for containers, specifically for hazardous materials and dangerous goods. Our services include transportation, handling and storage at one of our five bi- or trimodal terminals for cargo and tank containers, as well as dispatching, procurement, and rental services with consultation.

Additionally, we provide cleaning, maintenance, and repair services for coated tank containers with Proco-EMAIL and ChemLINE coatings. Our advanced Robogrind technology allows us to remove corrosion damage caused by chemical substances, as it grinds and polishes the inner wall of tank containers, extending their lifespan.

Chemion Container Logistics at a glance

- Storage space for a total of approximately 2,800 freight and tank containers primarily for dangerous goods containers.
- Maintenance and repair services
- Container rinsing station
- Rental service offering flexible duration and service levels
- Procurement, conversion and provision of containers

Port Logistics

Safe, congestion-free, and toll-free

Ports offer ecological and economic advantages for the handling of many raw materials and products in the chemical industry. Whether bulk goods or liquids: As part of bimodal handling, we connect the road and water transport modes – around the clock if needed. Our experienced, highly motivated, and well-trained personnel ensure excellent handling quality and safety in the interests of our customers. From inland waterway shipping to the operation of port facilities – we have the resources and experience to offer meticulously devised solutions.

Chemion Port Logistics at a glance

- 3,800 ships in incoming and outgoing goods with 4.6 million tons per year
- 4 bulk cargo cranes/excavators for 12 different products
- Handling of bulk goods onto transport and into warehouses/stockpiles
- 7 tanker ship berths for 24 different products/raw materials
- Loading and unloading of liquids via pipelines to/from customer plants

Where logistics and process engineering converge

Holistic optimization of production logistics processes is the goal of many customers. As a highly specialized service provider, Chemion can reliably, with experience and expertise, meet these requirements: In addition to production-preparatory, -post-processing, and -supporting processes such as filling and transferring, our constantly growing range of services also includes logistics-related production processes. In addition, our Sample Service Centre in Dormagen offers worldwide, fast shipping of sample shipments for your customers.

Chemion Production Logistics at a glance

- Filling of liquid substances in and out of any container sizes
- Solid filling in bags and big bags
- Filling and emptying of rail tank cars, tank trucks, tank containers, and skip containers
- Operating and managing of customer-owned tank farms
- Sample Service Centre: Logistics management, filling, and worldwide shipment of product samples – within 24 hours

Advantages on schedule

Take advantage of the economical, precisely plannable, and environmentally friendly option of rail transport – even over short distances! Chemion offers you in-plant and external rail transport, shunting services, and rail logistics. We also offer you the provision of tracks and equipment, e. g. for special trips and spot transport. Of course, we handle the entire organization and processing for your rail transport. Our CHEMPARK Shuttle connects the CHEMPARK locations of Leverkusen, Dormagen, and Krefeld-Uerdingen daily. Our strategic partnerships allow us to offer both national and international connections.

Chemion Railway Logistics at a glance

- Licensed railway company
- 11 diesel locomotives, 3 two-way vehicles, 70 locomotive drivers and wagon inspectors
- Plant shunting service with over 120 connected loading points in the CHEMPARK locations of Leverkusen, Dormagen, and Krefeld-Uerdingen
- External, regional rail and shuttle transport
- Process solutions through multimodal handling options
- Development of rail concepts

Active around the clock

Our experienced experts are also happy to help your company master logistical challenges. We offer loading time control, administrative processing, vehicle inspections, and freight checks for all modes of transport and transport equipment. At all three CHEMPARK locations in Leverkusen, Dormagen, and Krefeld-Uerdingen, our employees ensure smooth processes around the clock and handle more than 500,000 transport units annually.

Chemion Expedition at a glance

- Administrative incoming and outgoing goods processing as well as customs clearance for trucks, trains, and barges
- Incoming and outgoing weighing
- Technical vehicle inspections
- Automated processing of truck clearance („GATE“)
- Vehicle and loading time control
- Flexible transport clearance 365 days a year and around the clock
- Logistical annual performance: over 1 million orders

We lighten your load

To help you focus on your core business, we offer a wide range of logistics services at the three CHEMPARK locations, all under one roof. Start benefiting from one of our diverse offers, such as post, parcel, and express services both locally and around the world. Reduce effort, lower costs, and risks with our comprehensive fleet management for MHE, MV, and CV. In addition, we offer in-house services, delivery, installation, and commissioning of IT hardware such as PCs and printers, special packaging, freight forwarding services, and much more. Contact us.

Chemion Logistics Services at a glance

- Post, parcel, and express services: 800 parcels and about 40,000 letters per day
- MHE fleet management: Inventory of over 2,000 MHEs, including 400 ex-forklifts for short- and long-term rentals
- MV fleet management: about 50 different service and providing services, support for 2,800 vehicles
- Storage in accordance with GDP guidelines (purity class zone F)
- Services for Pharma and Engineering Logistics
